Abstract 1
Introduction 2
  Background 4
  Pupose and scope 5
  Acknowledgments 6
Flows in the lower Roanoke River 6
  Model study reach 8
  Approach 8
  Data-collection 9
  Preliminary analyses of Roanoke River water-level and flow data 13
    Reservoir releases and river stage 13
    Albermarle Sound water levels and Roanoke River water-level response 15
  Lower Roanoke River branch-network flow model 18
    Schematization 19
    Calibration 24
    Validation 26
  Plans for model completion 32
Continuously monitored water quality in Albermarle Sound 34
  Albermarle Sound study area 36
  Collection and analyses of data 37
    Instrumentation 37
    Field procedures 39
    Data processing 39
  Presentation of data 40
  Preliminary assessment of data 41
  Plans for completion of monitoring 47
Hydrodynamics of Albermarle Sound 48
  Hydrodynamic model area 48
  Approach 49
  Data collection 49
    Water level 51
    Inflow and outflow 51
    Wind 51
    Salinity and temperature 51
    Velocity 52
    Bathymetry 52
  Preliminary analyses of Albemarle Sound water levels 52
  Computational grid development 53
  Plans for completion of hydrodynamic model 57
Summary 58
