the areas are annexed.

3. It seems unlikely enough area on Weymouth Heights or Pinedene would be annexed at one time to make it economical to build a new treatment plant for the areas. Therefore, as sections of these areas are annexed, pumping stations should be built and sewers constructed to serve the annexed areas.

4. When all of this developing section is annexed, either in separate sections or all at once, a new waste treatment plant should be constructed to serve the areas south of the present municipal limits.

5. Several additions to the sewer system within town need to be made. (See map on next page for locations.)

   A. A new 10" line is needed to connect the 10" line at Ashe Street and Tillinghast Avenue with the 16" outfall line along the [illegible]. This addition would connect the [illegible] section of town with a [illegible] line.

   B. The [illegible] between south [illegible] road. These extensions [illegible] and the proposed public housing [illegible].

   C. The residential [illegible] Avenue and west of [illegible] the existing pumping station [illegible] occurs in that area.
