The Importance of Sowing

ALFALFA

FARMERS everywhere should make preparations to sow ALFALFA liberally this fall. Sown the end of August or during September, Alfalfa will yield full crops and make, under favorable conditions, four or five cuttings of splendid, nutritious hay the following season.

Alfalfa Hay makes the best and most nutritious feed for horses, cattle, and all live-stock, and it is especially desirable at this time for farmers to sow all the forage crops possible to make hay and feed, so as to save grain for human consumption. The live-stock industry is likely to continue very profitable for years to come, and farmers should endeavor to get their farms in suitable crops to carry all the live-stock possible, and Alfalfa is one of the most important crops for this purpose.

Conditions.—For Premiums Nos. 1 and 3: First, the exhibitors or duly qualified agents are required to make affidavit before 9 a. m. Wednesday of Fair Week and file with the Secretary of the Fair that the products exhibited were grown during the current year, in accordance with the requirements given above.

Third, that the following scale of points shall be used by the judges in making the awards on Premiums Nos. 1 and 3: Field Crops, 50 points; Garden Crops, 10 points; Home Industry, 10 points; Fruits, 10 points; Educational Value, 10 points; Artistic Arrangement, 10 points.

ROYSTER'S FERTILIZERS

In making the awards according to this classification, especial emphasis shall be given to the quality of the field and garden crops, fruits, and to the excellence and practical utility of the home industry exhibit.

The educational value of the exhibit shall be construed to mean practical lessons that may be drawn from it by farmers or others with reference to certain methods of handling, marketing, growing, and selecting seed of the different crops; for instance, samples of corn might be exhibited showing the effects of a systematic, intelligent system of seed selection, upon the quality of the corn, as well as upon its yielding powers. Again, an exhibit that would show the effect of spraying apples as against unsprayed would have great educational value. The effect of growing leguminous crops upon crop yields might be shown concretely or graphically. This, too, would bring out a most valuable lesson to those farmers who might study the exhibits. Many other exhibits of this nature might be devised which would have great value from an educational standpoint.

A neat cloth sign, not exceeding 16 feet in length, should be placed above each exhibit under Premiums 1 and 3, giving simply the name of the county.

ALL EXHIBITS OF INDIVIDUAL ARTICLES COMPETING FOR ANY OF THE SEPARATE PREMIUMS SHALL BE SEGREGATED AT SUCH POINTS AS MAY BE DESIGNATED BY THE DIRECTOR OR SUPERINTENDENT OF THE DEPARTMENT, AND SHALL NOT BE CONSIDERED AS A PART OF A GENERAL DISPLAY.

NOTE.—All Corn Club Premiums From D4 to D10 Will be Paid in the Form of War Savings Stamps and Thrift Stamps.

SECTION A—CORN CONTEST

Premiums marked with the letter D are offered jointly with State Department of Agriculture.

Instead of giving premiums for the greatest amount of corn grown on any one acre, the prizes are offered for the most prolific and best exhibits, to consist of ten ears, accompanied by three stalks with ears attached.

In judging corn in the exhibits made in this Department the awards will be made according to the following scale of points:

Prolificacy	30 points
Trueness of ear to variety type.....	20 points
Market condition	20 points
Character and uniformity of ears.....	15 points
Character and uniformity of kernels.....	15 points

(1) Prolificacy shall be interpreted as the total amount of shelled corn per stalk.

(2) Trueness of ears to variety type shall consider size of ears, color of grain and cob, and shape of ears.

(3) Market condition shall apply to the maturity of the ears, their sappiness, chaffiness, adherence of chaff to tip cap, adherence of tip cap to cob, plumpness of tips of kernels, soundness and lustre of kernels.

(4) In judging the character and uniformity of the ears of the exhibit consideration shall be given to length and diameter of ears, shape and filling out at butts and tips, straightness and arrangement of grain rows, purity of color of kernels, and space between grain rows.

(5) Character and uniformity of kernels shall apply to size and shape of kernels, size and condition of germs, filling out of space on the cob, color and purity of kernels, uniformity of kernels throughout length of ears and depth and width of kernels.

NOTE Result of 18 years tests, Ohio Agricultural Experiment Station.

UNFERTILIZED

FERTILIZED

Make Every Hour of Labor Produce 2 Bushels Instead of 1

It requires twelve hours of human labor to grow an acre of wheat. What do those twelve hours of labor yield? Note the result of conclusive tests at the Ohio Agricultural Experiment Station.

One way—without fertilizer—yielded 11 bu. per acre—or a little less than a bushel as reward for each hour's work.

The other way—with fertilizer—yielded 24 bu. per acre—or 2 bushels of wheat as reward for each hour's work.

In other words, these experiments proved that every hour spent in growing wheat on fertilized land brought in twice as much grain as the same amount of time spent in growing it on land without fertilizer.

The fertilizer actually added 13 bushels more

V-C Fertilizers

to the acre yield, paying for itself over and over again. These are experiment station facts. In view of these facts can you afford to plant wheat without applying fertilizer?

Give the crop the food it needs to build good strong straw and plump the pods of grain. Nitrogen is needed, in addition to Phosphoric Acid. For to beat the Hessian Fly, wheat should be planted late. The Nitrogen enables it to get a good start, even in cold ground, and resist the ravages of the fly.

Order Fertilizers Early

Our fifty factories and distributing points enables us to get fertilizer to you with a minimum amount of hauling, but due to the freight congestion, you should order NOW. Write us today for the name of V-C Dealers near you.

Department C—Poultry

MEMBER AMERICAN POULTRY ASSOCIATION.

Director, THOS. H. TAYLOR, Cary, N. C.

This year the management of the State Fair has inaugurated several reforms of far-reaching effect to the poultry interests of the State and section.

At the last meeting of the North Carolina Poultry Association held in Wilson in January a resolution was passed, the substance of which was that the poultry industry would be materially benefited, provided the Great State Fair together with the lesser fairs of the State would consent to make several changes in the way the poultry departments of the several fairs were conducted, to the end that greater encouragement would be offered to intending exhibitors.

These changes the State Fair has cheerfully made, relying on the support of the members of the above mentioned association and all interested poultrymen and women to make the poultry department of the Fair a greater success than ever before.

To this end the following rules have been adopted, which embody all the changes asked for in the resolution referred to, and which all intending exhibitors are asked to read carefully, noting the many changes for their benefit.

A contract has been closed with Spratt's Patent Limited, Newark, N. J., to coop and feed free to exhibitors all specimens entered and exhibited.

RULES AND REGULATIONS GOVERNING OPEN CLASSES.

1. Exhibits in this department will be limited to those from the States of North and South Carolina, Georgia, Virginia, and Tennessee.

2. No carload or professional "string-man" exhibit will be allowed to compete for premiums.

NOTE.—This rule will not be construed to debar any legitimate number of exhibitors from combining and chartering a car to transport their exhibits if by so doing they can save freight and other expenses, but it will be enforced against those it is intended to debar.

3. All entries must be made with the Secretary, J. E. Pogue, not later than Saturday, 6 p. m., October 12th, and specimens must reach Raleigh not later than 3 p. m., Monday, 21st. Judging will begin promptly at 10:30 o'clock a. m. on Tuesday. All specimens not in place at that time will be debarred from competition.

4. The American Standard of Perfection (revised edition) will be the guide of the judges in awarding the premiums.

5. All specimens should be banded and will be classified and each breed grouped.

6. All shipping should be marked with the contents as to the number and variety or breed it contains.

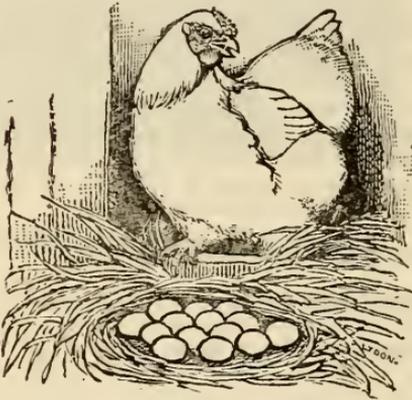

Definitions: Cock, a male specimen hatched prior to 1918; Cockerel, a male specimen hatched during 1918; Hen, a female specimen hatched prior to 1918; Pullet, a female specimen hatched during 1918; Pen, one male and four females.

7. Exhibitors need not accompany their fowls, although a cordial invitation is extended to them to do so. When addressed to Superintendent Poultry Department, State Fair, Raleigh, N. C., with express charges prepaid, they will receive proper attention and be returned to owners at the close of the Fair.

Gentlemen:-

I desire to express to you, both for myself and my associates, Messrs. S. T. Hooker, W. G. Clark and C. A. Johnson, our appreciation for the splendid sale made by your Company of the Avon Farm. 2200 acres of this farm were subdivided into thirty-one farms, and all brought a very satisfactory price, not a single one being purchased by your Company, or any of the parties interested, but by bona fide buyers. This farm was purchased early in the year by us for \$52,350.00, and sold by you for \$95,099.55, besides we retained the timber, and seven or eight hundred acres of timber land.

I think it was the best land sale I ever saw.

Sincerely yours,

Geo. A. Holderness

Before you even consider the sale of your property, write for information of our Auction Methods. It will convince you that you need us.

ATTRACTIVE DISPLAY OF FRUIT—NORTH CAROLINA STATE FAIR.
(Courtesy W. N. Hutt, Raleigh, N. C.)

Department D 1—Fruits

Director, W. N. HUTT.
(State Horticulturist.)

Entries close 6 p. m., Monday, October 21.

THE PREMIUMS OF THIS DEPARTMENT HAVE BEEN LARGELY INCREASED THIS YEAR.

As far as possible it is desirable that horticultural exhibits be brought in, set up, and entered by the growers. Where this is not possible, the Director will be glad to receive, place on exhibit, and enter for premiums all suitable horticultural products sent in. All exhibits competing for premiums must be grown in the State.

In sending in fruit for exhibition, select only those specimens that are perfect in form and color and free from all insect and fungous blemishes. Do not shake or knock off the fruit from the tree, but pick each specimen by hand, taking care not to pull the stem out. Wrap each fruit separately in paper and pack firmly in box or barrel, taking every care to avoid bruising. Label each variety and put in papers to keep varieties separate. Do not use hay, fodder, excelsior, or any other dusty material in packing. Nail up firmly and address to "State Fair, Department of Horticulture, Raleigh, N. C." Each package should be plainly marked with the name and address of the exhibitor. Barrels of apples to compete in class of commercial barrel pack must be faced and headed.

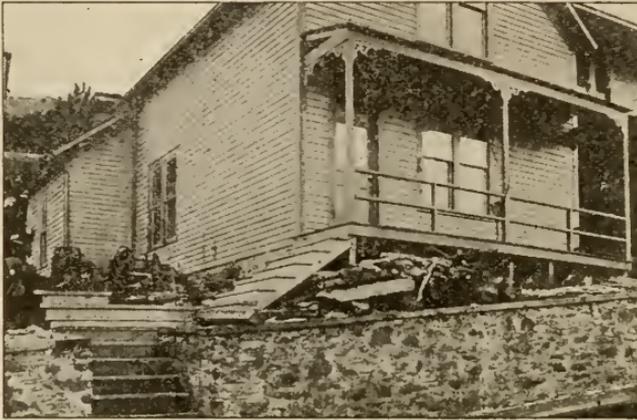

At the opening of the Fair plates for the variety exhibits of fruit will be furnished free by the Secretary.

A perfect plate of fruit should contain five specimens and no more, with stems attached characteristic of the variety, of high color, of uniform marketable size, free from cuts or bruises and all insect and fungous blemishes. If additional specimens are sent in by growers, the committee will select and place on exhibit the best possible plate to be made from all the specimens submitted.

Commercial box apples should be graded to uniform size, of high color, free from bruises and insect and fungous blemishes. They should be properly packed in standard bushel boxes of $10\frac{1}{2}$ by $11\frac{1}{2}$ by 18 inches, inside measurement. The boxes should be of soft, light wood, smooth-sawed inside, and dressed outside. The ends are three-quarters of an inch thick, the sides three-eighths of an inch and the bottom one-quarter of an inch. The attractiveness of the label will be taken into consideration.

Commercial barrel apples should be fairly uniform in size, of high color, and free from bruises and insect and fungous blemishes. Special attention will be given to brands and labels.

The Director will see that each plate of fruit is plainly marked and correctly named and the entry tag attached to the same, so that the entry can be identified by the judges without difficulty. A premium offered for a general collection of fruit will not be awarded to a mere pile of apples or other fruit, but must be for a real collection, arranged on plates and all correctly labeled, and no fruit will be counted in a collection unless it is a fair specimen of the variety. No trashy fruit of any kind will be counted merely to make up a collection. A premium for the best collection of grapes, peaches, or any other fruit will not be awarded to a mere number, but to the quality of the exhibit mainly. The Director may withhold premiums in any case where there is no competition and the article is of inferior quality, and no second premium will be given solely because there is no other exhibit but the two, but all fruits must be of good quality. No article entered for competition in any one class will be permitted to compete for a premium in any other class, excepting sweepstakes, and no exhibitor may make two entries under one entry number. No attention will be paid by the committee to any fruit or

other exhibit that is not arranged in accordance with these rules. All fruit must be shipped or brought in so as to arrive at the Fair Ground not later than Monday noon of Fair week. The awards for fruits will be made on the afternoon of the second day of the Fair. No exhibitor will be allowed to discuss exhibits with the judges, or to interfere in any way while the judges are at work. To avoid all unnecessary walking to and fro on the part of the judges, the fruit exhibit must be arranged in consecutive space near together, and not scattered about the buildings.

In the exhibits of exotic plants in pots, the plants competing for each premium must be arranged by themselves, as the judges will not hunt among a mass of plants to find the ones competing for special premiums, and no plant in professional class will be awarded a premium unless it is a well-grown specimen of its kind. In the premium for the best and largest assortment of cut flowers each variety must be shown in a separate bottle of water or other vessel to show them properly and keep them fresh, and no notice will be taken of collections loosely thrown on the tables.

In the nomenclature of fruits, the names adopted by the American Pomological Society will rule, and no variety will be accepted that has not been admitted to their catalogue, except in the case of seedings never before exhibited. A pile of fruit brought for sale merely will not be allowed to count in a general collection of fruit, as all fruits shown for premiums must be arranged on plates and remain on them until the close of the Fair.

Department D 2—Truck and Vegetables

Director, W. N. HUTT.
(State Horticulturist.)

Entries close 6 p. m., Monday, October 21.

The exhibits for this department should be carefully packed and sent or brought to the "State Fair, Department of Truck and Vegetables, Raleigh, N. C." All exhibits must be grown in this State. The Director will be glad to receive and enter all that are sent in.

All varieties of vegetables entered for a premium must be true to name and free from blemishes. They should be well selected as to uniformity, freedom from blemishes, and trueness to type. Premiums offered for best collections will not be awarded for the greatest number of varieties in the collection, but they will be mainly awarded for the quality of the exhibit. The Director may withhold premiums in any case where there is no competition and the article is of inferior quality; no second premium will be given solely because there is no other exhibit but the two; all awards will be based on the quality of the vegetable exhibited. In order to avoid confusion, all exhibits of vegetables must be in place and arranged in the space assigned to this department by noon of the first day. All exhibits not in place by then will not be considered. Exhibits must not be scattered throughout the buildings.

Exhibitors will not be allowed to discuss the exhibits with the judges, nor must they interfere in any way while the judges are at work.

PHARMACY

In the present National crisis a continuous supply of adequately trained medical officers is absolutely essential for the maintenance of armed forces in the field. It is, therefore, the patriotic duty of all college students intending to study medicine to remain under instruction until the country can avail itself of their trained services. All medical students should, therefore, in the interest of National safety, continue their work until graduation.

The Mammoth Black 978-lb. Hog

Originated, introduced, and for sale by John A. Young & Sons. The Mammoth Black, originated by a judicious selection and crossing the Big Guinea, Poland-China, and Black Essex.

We have been breeding this hog up for more than twenty years. One we sold Mr. J. L. Guyer, of Wallburg, Davidson County, dressed net 978 pounds. This is a large, smooth, black hog, laying on fat at any age, and easily dressing 300 to 500 pounds at twelve months old. We think this the greatest hog on earth. As we are very careful about our selections, we can only offer a limited number. Price, \$20 each, f. o. b. here, eight to ten weeks old.

Announcements

The Annual Better Babies Contest, Mrs. W. A. Withers, Director, cannot be held this year on account of the fact that the physicians and experts who make the examinations have gallantly gone to the War.

The quarters used for the contest will this year be turned into commodious Rest Rooms, with nurse attendants, for tired women and children, and they are invited to make themselves at home in the Woman's Building Annex.

The American Shorthorn Association, Chicago, Ill., will add 50 per cent to the special premiums listed under Shorthorns. This came too late for publication in the classification.

Director of Live-stock.

Southern SHORTHAND AND BUSINESS UNIVERSITY

NORFOLK, VIRGINIA

Attention! Fathers, Mothers; Young Men, Young Ladies.

FATHERS AND MOTHERS: Within the next few weeks thousands of fathers and mothers will have to decide on the further development of their son's or daughter's education; and their decision will, in all probability, decide that son's or that daughter's future. This is indeed a great responsibility, and one that should be given most serious and intelligent thought by every parent. Are you going to give your son or your daughter a *practical* education, or are you going to give him or her an impractical education, an essential education or a non-essential education? Are you going to give your children diamonds for their fingers and no shoes for their feet, educationally? They will need woof and warp, not frills and ruffles; they will need high-powered rifles, not popguns, if they are to achieve success.

We have trained thousands of young men and women for business careers and for government positions. We can train YOUR boy or girl. Write for further information. Address

FOOD CROPS FIRST

North Carolina *must* feed itself this year. So *must* every other Southern State. To accomplish this, increased yield per acre is just as essential as increased acreage. "Food will win the war" is a popular slogan. If this be true, it *must not* be said that North Carolina failed to do her part. The flower of the young manhood of the South is either in France, on the way, or preparing to go. Shall North Carolina be content simply to feed herself? Is it not her *duty* at least to contribute to the feeding of her sons "over there"?

Every farmer in the South should make his plans now to substantially increase his *food crops*. In making such plans it is very essential to carefully select your *Fertilizers*. Increased yield per acre can only be obtained by proper fertilization. Increased yield per acre means increased profits to *you*, as well as "doing your bit" to win the war.
